

**UNITED STATES DISTRICT COURT
DISTRICT OF NEW JERSEY**

ROBERT SCHMIDT,
RUSSELL ADAMS, and JASON TAYLOR
individually and on behalf of all others similarly
situated,

Plaintiffs,

v.

JAGUAR LAND ROVER AUTOMOTIVE PLC and
JAGUAR LAND ROVER NORTH AMERICA,
LLC,

Defendants.

Civil Action No. 18-cv-08528-CCC-JBC

**SECOND AMENDED CLASS
ACTION COMPLAINT AND JURY
TRIAL DEMAND**

Plaintiffs Robert Schmidt (hereinafter “Schmidt”), Russell Adams (“Adams”), and Jason Taylor (“Taylor”) (hereinafter collectively “proposed class representatives”) through their undersigned counsel, on behalf of themselves and all other individuals and entities similarly situated as more fully described *infra*, allege as follows:

1. This proposed class action involves 2012 through and including 2014 model year Land Rover LR4 and Range Rover Sport motor vehicles sold in the United States (hereinafter collectively “class vehicles” or “class vehicle”).

2. Class vehicles are equipped with eight cylinder multi-valve 5.0 liter AJ-V8 Gen III engines (hereinafter “class engines” or “class engine”) in various configurations including supercharging. The named Plaintiffs and proposed class representatives and members of the proposed classes request injunctive relief, monetary damages, including multiple damages where applicable, court costs and attorney fees against each of the respective Jaguar Land Rover entities based upon their breach of express warranty, breach of implied warranty, misrepresentation, unfair and deceptive business

practices under the laws of New Jersey, Florida, Washington state and the Magnuson-Moss Warranty Act and/or alternatively, as a nationwide class as further defined *infra*.

3. As a result of the defects described in this complaint, class engines are predisposed to premature primary chain assembly failures.¹ The chain assemblies are comprised of internal engine components. The primary chain (a/k/a the timing chain) assembly connects and synchronizes the engine's camshafts and crankshaft, which in turn controls the opening and closing of the valves in the engine's combustion chambers. The primary chain assembly ensures the engine operation occurs in the precise, synchronized manner necessary for the engine to properly function. A primary chain assembly partial or complete failure allows the chain to skip teeth on the chain sprockets. This occurrence causes the camshafts and crankshaft to fall out of synchronization and lose power or cause the engine's pistons and valves to violently collide. One indicator of impending chain failure is excessive timing chain noise caused by a loose and/or worn chain.

4. Depending on the degree of camshaft and crankshaft misalignment, the engine will operate poorly resulting in stalling and a limited ability to accelerate or maintain vehicle speed. Primary chain assembly failures can also cause sudden and catastrophic engine self-destruction as the valves impact the cylinder pistons where the chain skips multiple teeth of the sprockets in one occurrence or the chain breaks.

5. The primary chain tensioning rails that regulate timing chain tension via chain tensioners in class engines are defective and prematurely fail. The primary chain tensioner rail bodies are constructed from cast aluminum. The timing chain tensioner piston that acts on the respective tensioner rails is constructed from hardened steel. The contact point between the piston-rail causes a wear point in the tensioning rail that in turn causes excessive outward movement of the tensioner

¹ The primary chain assembly is comprised *inter alia* of camshaft and crankshaft sprockets, primary (timing) chain, hydraulic chain tensioner, tensioning guides and chain guides. The primary chain assembly is depicted in Figure 1, *infra*.

piston, chain slack and resulting chain rattle. If enough chain slack is induced, chain skip occurs resulting in severe engine damage or complete engine destruction. These scenarios pose a serious safety issue while the vehicle is being operated since there is loss of engine power without warning, loss of power-assisted steering and reduced braking caused by lack of engine vacuum. In other instances, the engine may fail to start, leaving the driver and passenger stranded mid-journey. Additional chain slack is introduced because the gear chain materials selected for class engines have a propensity to elongate (stretch) more than conventional roller chains which in turn results in excessive wear to the chain sprockets.

6. Class vehicles are defective with respect to the primary chain assemblies that subjects class engines to premature catastrophic engine failure. Class vehicles are further defective since the vehicles were accompanied by an owner's manual and service and warranty information that did not incorporate primary chain assembly inspections, maintenance and/or service intervals that were in fact necessary given the assemblies' propensity for premature failure.²

7. Engines employing timing belts have inspections at regularly scheduled intervals (usually commencing at 60,000 miles and every 20,000 miles thereafter if not replaced at 60,000 miles) and replacement at approximately 100,000 miles. With the reemergence of timing chains as the preferred engine valve train drive design, vehicle manufacturers proclaimed the chain components to be maintenance free and were further advertised to last the life of the vehicle.

8. The primary chain assemblies are reasonably expected by Jaguar Land Rover Automotive PLC (hereinafter "Land Rover") and Jaguar Land Rover of North America, LLC (hereinafter "Land Rover LLC") (hereinafter collectively referred to as "defendants"), as well as by the proposed class representatives and proposed class members to last to 100,000 miles.

² A substantial contributing cause of premature class engine primary chain assembly failure is 15,000 mile oil change intervals for class engines.

9. The primary chain assembly in class vehicles often fails prior to their reasonably expected useful life. Plaintiffs' class vehicles experienced or began to experience primary chain assembly failure at approximately 50,000 to 80,000 miles.

10. After experiencing a failure of the chain assemblies, some class engines are not repairable and require complete engine replacement. Class engine failures cost class vehicle owners between \$4,500.00 (to replace some of the components of the primary chain assemblies where there is no engine damage) and can, on occasion, be greater than \$20,000.00 (for a new replacement engine).

Jurisdictional and Venue Statement

11. Federal jurisdiction exists by virtue of the Class Action Fairness Act of 2005 ("CAFA"), 28 U.S.C. §§ 1332(d), 1453 and 1711–1715 since there are in excess of 50,000 class members and proposed class members' aggregate damages exceed \$5,000,000.00, exclusive of interest and costs. Minimal diversity exists between the parties with residency in different states. The jurisdictional requirements of the state Magnuson–Moss Act claims alleged herein as set out in 15 U.S.C. § 2310(d)(1)(A) are satisfied by CAFA diversity jurisdiction with respect to such state law claims.

12. The defendants are persons under this jurisdiction's long-arm statute. In the United States, Land Rover LLC acts as the alter ego and/or agent of Land Rover as well as the warrantor with respect to the class vehicles. *In personam* jurisdiction exists over the defendants under this jurisdiction's so-called "long arm statute." The defendants, directly and through their agents, regularly transact business and otherwise derive substantial revenue in this jurisdiction and throughout the entire United States. The defendants also conduct continuous, purposeful and pervasive economic activities in this jurisdiction and throughout the United States. The defendants intentionally and purposefully placed their vehicles and/or components in the stream of commerce in this jurisdiction and throughout the United States. Subjecting the defendants to *in personam* jurisdiction in this jurisdiction does not

violate the defendants' due process rights and comports with requirements of fair play and substantial justice.

13. Venue is conferred by 28 U.S.C. § 1391 as the defendants regularly and purposefully conducted business in this judicial district and a substantial part of the events giving rise to the claim occurred in this judicial district.

Parties

14. Plaintiff Schmidt is an adult individual who resides in Basking Ridge, New Jersey. In August of 2012, Schmidt purchased a new 2013 Range Rover Sport equipped with a class engine from Land Rover Paramus, an authorized Land Rover dealer. Schmidt's class vehicle began to experience primary chain assembly failure at 80,000 miles when the timing chain began making noticeable abnormal noises associated with premature wear in November 2017. At no time during the warranty period when Schmidt brought his car in for service did the dealer ever inform Schmidt that his engine's timing chain system was defective and should be repaired while the vehicle was within warranty.³ As the timing chain noise became progressively louder, Schmidt was finally advised by his authorized Land Rover dealership that the timing chain assembly should be replaced and that he should request warranty assistance directly from Land Rover LLC. Schmidt, therefore, contacted Land Rover LLC and was informed by a representative of Land Rover LLC that there would be no financial assistance from Land Rover LLC to repair his class engine or provide substitute transportation. Land Rover LLC also declined such relief to other class vehicle owners for timing chain repairs where their respective vehicles were outside of the express warranty period. Although his vehicle's chain assembly failure occurred outside the unilateral express warranty period, Schmidt's class vehicle exhibited

³ Authorized Land Rover dealers were instructed by Land Rover LLC to inform class vehicle owners who complained of engine timing chain rattles or clicking that these noises were completely normal when such noises were an indicator of premature chain assembly wear. Only when the chain noise became so noticeable that it couldn't be described as normal were class vehicle owners informed that the chain assemblies should be replaced.

unmistakable symptoms (known only by the defendants) of degradation and impending premature failure within the express warranty period. The timing chains, tensioning rails and tensioners in Schmidt's class engine were replaced in April 2018 at a cost of approximately \$4,500.00 by an independent Land Rover specialty repair facility after Schmidt receive an estimate from his Land Rover dealer that was substantially more.

15. Plaintiff Russell Adams is an adult individual who resides in Tampa, Florida. In or about August 2017, Adams purchased a used 2012 Range Rover Sport equipped with a class engine from Reeves Land Rover in Tampa, Florida, an authorized Land Rover dealer. Adams' class engine experienced a timing chain failure at approximately 92,000 miles in or about July 2018 that damaged the engine so severely that his vehicle may require an engine replacement. Reeves Land Rover, an authorized dealer in Tampa, Florida, gave Adams a quote of approximately \$15,000.00 for the repair. He requested that the engine be repaired under warranty. Defendant Land Rover LLC denied the request and instead offered a goodwill payment of \$700.00.

16. Plaintiff Jason Taylor is an adult individual who resides in Bainbridge Island, Washington. In 2015, Taylor purchased a used 2012 Land Rover LR4 equipped with a class engine. The vehicle was purchased in Washington State. At the time of purchase, the vehicle had approximately 34,000 miles and was still covered by a transferable new vehicle warranty issued by Land Rover LLC.

17. Taylor's class vehicle's engine experienced a timing chain failure at approximately 85,000 miles in or about September 2018. Plaintiff Taylor brought the vehicle to Tacoma Land Rover and received a quote to repair the timing chain of approximately \$5,500.00. At the time of this amended complaint filing, plaintiff Taylor has been making arrangements to have the vehicle repaired at Tacoma Land Rover.

18 Defendant Land Rover is a duly organized British corporation with a principal place of business in the city of Whitley, Coventry, England, CV3 4LF. Land Rover designed, manufactured

and tested the class engine, including but not limited to the primary chain assembly incorporated in class vehicles.

19. Land Rover drafted and published the owner's manual and service and warranty materials that accompanied class vehicles and/or were published on the Internet. Land Rover is the parent company of Land Rover LLC.

20. Defendant Land Rover LLC is a duly organized Delaware corporation with a principal place of business located at 555 MacArthur Boulevard in Mahwah, New Jersey. Land Rover LLC imports, distributes and/or sells Land Rover and Jaguar motor vehicles including all class vehicles and also acts as the authorized representative of Land Rover in the United States. Land Rover LLC operates its national marketing, warranty, consumer relations and engineering offices from its New Jersey facility. Land Rover LLC also controls all other aspects of its United States activities from New Jersey including, class vehicle importation.

21. Land Rover LLC sells and distributes vehicles manufactured by Land Rover throughout the United States via a network of approximately two hundred independent authorized dealerships. Land Rover LLC drafted, published and/or had substantial input into the owner's manual and service and warranty materials that accompanied class vehicles. Land Rover LLC acted, and continues to act, as the warrantor of vehicles constructed by Land Rover sold in the United States. Pursuant to regulations adopted under the Motor Vehicle Safety Act, 49 C.F.R. Part 551D, Land Rover LLC has been designated as Land Rover's agent with NHTSA.

22. At all relevant times, Land Rover LLC acted as an authorized agent, representative, servant, employee and/or alter ego of Land Rover performing activities concerning but not limited to advertising, marketing, warranties, warranty repairs, dissemination of technical information and monitoring the performance of Land Rover vehicles in the United States, including substantial activities that occurred within this jurisdiction. There is sufficient overlapping and intertwining of the

activities of Land Rover and Land Rover LLC in the United States that the principles of corporate separateness should not be applied.

23. New Jersey has the most significant relationship to the conduct that gave rise to this litigation since Land Rover LLC's wrongful activities were orchestrated at its New Jersey headquarters. New Jersey law should govern all substantive aspects of this litigation. That conduct includes the concealing of defects described in this complaint and other activities to deny warranty coverage to defective engine components that should have been replaced under the new vehicle warranty without cost to the class vehicle owner as described in this complaint.

Class Action Allegations

24. The proposed class representatives bring this proposed class action pursuant to Fed. R. Civ. P. 23(b)(1), 23(b)(2) and 23(b)(3) on behalf of themselves and all members of the proposed class and (or any other class authorized by the court) defined as follows:

Nationwide Class: All current or former owners or lessees of a class vehicle who purchased their vehicles in the United States (hereinafter "proposed class members"). Excluded from the proposed class are the following: (i) owners and lessees who first purchased or leased a Class Vehicle nine or more years after such Class Vehicle was registered for the first time; (ii) owners and lessees of a Class Vehicle on which a timing chain and/or timing chain tensioner was first replaced when such Class Vehicle had been in service for more than eight years or driven for more than 100,000 miles; (iii) any judge assigned to the Litigation; (iv) financial institutions; and (v) JLRNA and its officers, directors and employees. Also excluded from the proposed class are any and all claims involving personal injury.

New Jersey Class: All current or former owners or lessees of a class vehicle who purchased their vehicles in New Jersey (hereinafter "proposed New Jersey class members"). Excluded from the proposed class are the following: (i) owners and lessees who first purchased or leased a Class Vehicle nine or more years after such Class Vehicle was registered for the first time; (ii) owners and lessees of a Class Vehicle on which a timing chain and/or timing chain tensioner was first replaced when such Class Vehicle had been in service for more than eight years or driven for more than 100,000 miles; (iii) any judge assigned to the Litigation; (iv) financial institutions; and (v) JLRNA and its officers, directors and employees. Also excluded from the proposed class are any and all claims involving personal injury.

Florida Class: All current or former owners or lessees of a class vehicle who purchased their vehicles in Florida (hereinafter “proposed Florida class members”). Excluded from the proposed class are the following: (i) owners and lessees who first purchased or leased a Class Vehicle nine or more years after such Class Vehicle was registered for the first time; (ii) owners and lessees of a Class Vehicle on which a timing chain and/or timing chain tensioner was first replaced when such Class Vehicle had been in service for more than eight years or driven for more than 100,000 miles; (iii) any judge assigned to the Litigation; (iv) financial institutions; and (v) JLRNA and its officers, directors and employees. Also excluded from the proposed class are any and all claims involving personal injury.

Washington Class: All current or former owners or lessees of a class vehicle who purchased their vehicles in Washington (hereinafter “proposed Washington class members”). Excluded from the proposed class are the following: (i) owners and lessees who first purchased or leased a Class Vehicle nine or more years after such Class Vehicle was registered for the first time; (ii) owners and lessees of a Class Vehicle on which a timing chain and/or timing chain tensioner was first replaced when such Class Vehicle had been in service for more than eight years or driven for more than 100,000 miles; (iii) any judge assigned to the Litigation; (iv) financial institutions; and (v) JLRNA and its officers, directors and employees. Also excluded from the proposed class are any and all claims involving personal injury.

Numerosity of the Class: Fed. R. Civ. P. 23(a)(1).

25. The proposed classes are so numerous that individual joinder of all potential members is impracticable under Fed. R. Civ. P. 19 or 20. It is estimated there are in excess of approximately 50,000 class vehicles imported into the United States. Although the number, location and identity of all proposed class members cannot be presently ascertained, this information is obtainable through discovery from the defendants.

Existence of Common Questions of Law and Fact: Fed. R. Civ. P. 23(a)(2) and 23(b)(3).

26. Common questions of law and fact exist as to all members of the proposed class and predominate any and all issues of law and fact affecting individual members of the proposed class. These issues include but are not limited to:

(a) Whether class engines were defectively designed and/or manufactured, including workmanship and materials, so as to subject the engine to premature failure of the primary chain assemblies;

(b) Whether class engines sustained damage directly or indirectly by premature failure of the primary chain assemblies;

(c) Whether class vehicles were sold with an owner's manual and/or service and warranty materials that incorporated incorrect inspection and service intervals for the primary chain assemblies;

(d) Whether the defendants breached their express warranties (including but not limited to the powertrain-limited warranty) in that class vehicles were defective with respect to engine design and manufacture, including workmanship and materials;

(e) Whether the defendants breached their implied warranties in that class vehicles were defective with respect to engine design, manufacture, workmanship and/or materials;

(f) Whether the defendants intentionally or negligently misrepresented material facts concerning the characteristics of class engines;

(g) Whether the defendants committed unfair and deceptive business act practices under the laws of New Jersey and/or Florida and/or Washington by failing to inform owners of class vehicles prior to purchase and/or during the post-sale express warranty period that the primary chain assemblies were defective and would fail shortly after the warranty period expired and cause damage to the engine, and that this defect posed a significant safety hazard;

(h) Whether proposed class members are entitled to monetary damages and injunctive relief pursuant to Rule 23(b)(2);

Typicality of Claims or Defenses of a Definable Class: Fed. R. Civ. P. 23(a)(3).

27. The proposed class representatives' claims and defenses are typical of the claims and defenses of proposed class members. Class claims arise out of ownership or lease of class vehicles as defined in ¶ 1. There are no defenses to plaintiffs' claims on the part of defendants that are unique or different from the proposed class.

Adequate Representation: Fed. R. Civ. P. 23(a)(4).

28. The proposed class representatives currently own their class vehicles and have no conflicting interests with any other proposed class member. The proposed class representatives will fairly and adequately protect the interests of the proposed subclasses. The proposed class representatives' claims and the proposed class members' claims are so interrelated that the interests of the proposed class members will be fairly and adequately protected in their absence. The proposed class counsel have, in aggregate, over 60 years of experience concentrating in complex automotive products liability, and have been appointed class counsel in other proceedings.

Superiority of a Class Action: Fed. R. Civ. P. 23(b)(3).

29. Maintenance of a class action in one court is the most economical procedural device to litigate the class vehicle and class engine claims for class vehicle owners and the defendants. Prosecution of separate actions by individual members of the class could create risk of inconsistent or varying adjudications with respect to individual members of the class which would establish incompatible standards of conduct for the party opposing the class as recognized by Fed. R. Civ. P. 23(b)(1)(A).

30. Prosecution of separate actions by individual members of the class could create risk of adjudications with respect to individual members of the class which would, as a practical matter, be dispositive of the interests of the other members of the class who are not parties to the adjudications or substantially impair or impede their ability to protect their interests as recognized by Fed. R. Civ. P. 23(b)(1)(B).

31. There is a substantial likelihood that the defendants will oppose this class action and will further act or refuse to act on grounds generally applicable to the class, thereby making appropriate final injunctive relief or corresponding declaratory relief with respect to the class as a whole pursuant to Fed. R. Civ. P. 23(b)(2).

32. Questions of law and fact common to members of the class predominate over any questions affecting any individual members and a class action is superior to other available methods for the fair and efficient adjudication of the controversy as recognized by Fed. R. Civ. P. 23(b)(3).

Class Engine Timing Chain System Defect

33. If designed and manufactured correctly, engine primary chain assemblies should last 100,000 miles. This is demonstrated by the defendants' service and warranty materials accompanying class vehicles, other engines manufactured by the defendants incorporating a primary chain assemblies and performance of comparable competitor vehicles.

34. Defendants' class engines use hydraulic chain tensioners (one for each cylinder bank) incorporating an internal coil spring and oil passages to regulate tension on the chain-tensioning rail that applies tension to the respective timing chains. This tension keeps the chain from jumping the teeth on the sprockets that are attached to the crankshaft and camshafts and maintains synchronization between rotating engine components including the cylinder valves and pistons. Without proper chain tension and synchronization, the engine will run very poorly (if at all) and/or, if sufficient chain skip and mis-synchronization occurs, its failure to function properly will cause cylinder valves and pistons to collide, resulting in severe internal damage to the engine. The class engine timing chain assemblies are depicted in Figure 1 (excerpted from the Technical Training manual published by Land Rover LLC).

35. Class engines employ cast aluminum tensioning rails (described in Figure 1 as "aluminum backed chain guide") with a nylon shoe that contacts the timing chain. The primary chain tensioner piston that is constructed of hardened steel transmits force on the much softer aluminum-tensioning rail. Over an unreasonably short duration of time, the tensioner piston wears a recess into the tensioning rail at the contact point. As a result, the chain begins to rattle and is no longer properly tensioned. The defendants have been concealing the problem since 2011 when it began to redesign the

chain tensioner to alleviate the problem but without revealing to class members the defect or its knowledge thereof. This effort culminated in or about February 2017, when Land Rover LLC again released a series of Technical Bulletins and follow up publications to address defects in class engine chain assemblies. *See* Technical Bulletin LTB00474NAS3 issued May 19, 2015 attached as Exhibit A. Technical Bulletin LTB00474NAS3 dated May of 2015 is a reissue of an earlier released Technical Bulletins concerning the identical timing chain assembly issue caused by loose primary chains. The bulletin recites, “This reissue replaces all previous versions. Please destroy all previous versions.” There has been a series of Technical Bulletins addressing the class engine chain assemblies over the years dating back to the class engine’s predecessor 4.4 liter engine with a substantially similar gear chain and internal tensioner layout utilized in 2005 through and including 2009 model year vehicles.

36. The dates of these multiple bulletins, comments on various web sites concerning failure dates and the lead time necessary to investigate class engine chain assembly failures, redesign and manufacture the updated components demonstrates that the defendants were aware of defects in the redesigned primary chain assemblies in late 2010 or early 2011 (as discussed *supra*, assemblies had been previously redesigned earlier). Moreover, the defendants have continuously upgraded the timing chain assembly components since the class engines were introduced in an effort to remedy the defects and prevent premature chain failures.

37. As a result of the defects described in this complaint, the defendants redesigned the primary chain, primary chain tensioner and primary chain guide/rails incorporated in class engines multiple times. The defendants also changed the materials these components were constructed of in an effort to resolve the primary chain assembly defects that cause catastrophic engine failure. *See* Figure 2, *infra* depicting the class engine original primary chain tensioner and tensioning rail together with the revised designs. The revised tensioner has a significantly lower mounting angle with respect to the tensioning rail. The tensioning rail has a steel insert cast into the rail where the tensioner piston contacts the rail.

These subsequent changes, both in design and materials, were implemented to reduce wear and the resulting chain slack caused by an improperly tensioned chain and decrease the incidence of primary chain assembly failure.

Cylinder Heads

Components and Systems

Valve Train

Twin overhead camshafts operate the engine's valves. A maintenance-free highly durable chain transfers drive from the crankshaft to the camshafts, via the variable camshaft timing (VCT) units. The oil pump is driven at 0.87 engine speed by a separate chain, also from the front of the crankshaft, for reduced friction.

FIGURE 1: CLASS ENGINE CHAIN ASSEMBLIES⁴

⁴ © 2009 Land Rover LLC

39. Another cause of primary chain assembly failure in class engines results from a materials defect, manufacture defect and/or design defect is premature and unacceptable excessive chain stretch. When this condition occurs, slack introduced into the primary chain assembly causes misalignment of the camshafts and crankshaft synchronization. As the chain stretch condition worsens and the capacity of the hydraulic chain tensioners is exceeded, chain slippage on the camshaft/crankshaft sprocket teeth will eventually allow sufficient camshaft and crankshaft synchronization misalignment causing engine stall and/or the pistons to collide with the cylinder valves causing catastrophic engine damage. The type of chain selected for the class engine primary chains is known as a gear chain (a/k/a top load chain and/or inverted tooth chain). Gear chains if not properly constructed from suitable materials and under strict manufacturing tolerances are particularly susceptible to premature elongation especially in automotive engines with longer timing chains such as V8 engine applications including the class engine. Chain elongation results in chain sprocket wear because the individual chain links no longer mesh correctly with the sprocket teeth. This exponentially increases the wear of the chain assembly contact surfaces resulting in catastrophic failure.

#

FIGURE 2: ORIGINAL AND REVISED CLASS ENGINE TIMING CHAIN TENSIONERS AND RAILS⁵

⁵ © 2009 Land Rover LLC. The factory workshop manual for the class engine chain assembly components depicted in Figure 2 recites as follows:

68.  **CAUTION:** If a new timing component is to be installed, then components labelled 2 in the illustration, must be installed (as this is the latest version of the timing components). Do not attempt to install the components labelled 1, as damage to the engine may occur.

The differences and orientation of the timing components can be seen. Original components (1) new components (2). The original **timing chain** tensioner (1) is angled, the new **timing chain** tensioner (2) is not angled.

40. Rather than correct both the tensioner/tensioning rail defect together with the chain elongation defect, the defendants elected to ignore the chain elongation defect with the apparent hope the revision of the tensioner/tensioning rail would also alleviate chain elongation, knowing that the problem is accentuated in longer gear chains as those used in class engines. The chain assemblies for the class engines have been redesigned, were fabricated from different materials and/or subjected to more stringent manufacturing tolerances after the revisions to the chain tensioner and tensioning rails failed to resolve class engine premature chain failures.⁶

41. Prior to manufacturing and distributing a new part, defendants perform substantial field inspections and quality review of vehicles in service to determine the root cause and diagnosis of a problem. After these tasks are completed, the defendants prepare draft and final specifications prior to setting the revised part out to bid. All of this takes at least twelve (12) months of lead-time under normal circumstances.

42. The defendants knew or should have known no later than late 2010 or early 2011 that the chain assemblies and related components in class engines were defective and would prematurely fail.

43. The defendants' knowledge is evidenced by the fact that both the tensioners and tensioning rails were redesigned. These components were also the subject matter of multiple Technical Bulletins issued between 2013 and 2015. There was also a revision to the factory workshop manual instructions to technicians on proper selection and installation of the revised tensioning rails and tensioners. *See* Figure 2, *supra*.

44. Complaints online, which are carefully monitored by defendants, demonstrate failed primary chain assemblies in class engines.

⁶ The excessive and premature gear chain elongation issues have not been completely resolved since class engines are still experiencing timing chain assembly failure shortly after the warranty expires.

Complaints to the National Highway Traffic Safety Administration

45. The National Highway Traffic Safety Administration (“NHTSA”) Office of Defects Investigation (“ODI”) maintains a database of complaints filed by consumers concerning defects in their motor vehicles and vehicle equipment. The NHTSA-ODI website allows consumers to “identify and report problems you might be having with your vehicle, tires, equipment or car seats.” *See* <https://www-odi.nhtsa.dot.gov/ivoq/> (last accessed April 10, 2018) (“If you think you have a problem, we want you to tell us about it.”). there were numerous complaints reported to the NHTSA demonstrating that the 5.0 class engine chain defect was known to the defendants and constitutes an unreasonable safety hazard

Tolling of the Limitations Period

46. The fraudulent conduct of the defendants tolls any applicable statutes of limitations since the fraudulent misrepresentations concerning the true cause of failures in class vehicles was an inherently unknowable fact given the technical nature of the class vehicle design and manufacturing defects, including materials and workmanship.

47. Class vehicle owners do not possess the requisite technical skills in automotive engineering to discern the design, manufacture, materials and workmanship defects in their vehicles or the requisite technical skills to surmise the proper vehicle maintenance and maintenance intervals for class vehicles.

48. The statutory and case law of New Jersey and the various state laws applicable herein, together with the doctrine of equitable tolling and/or the discovery rule, toll the applicable statutes of limitations for all class vehicles because of the defendants’ fraudulent conduct, including but not limited to concealment of class vehicle defects and omission of material facts.

49. Some proposed class members relied on the defendants’ fraudulent misrepresentations concerning the cause of class engine failures and therefore delayed bringing suit against the defendants. These misrepresentations relate to the fact that, in reality, class engines were failing due to design, manufacture, materials and/or workmanship defects. The defendants, however, fraudulently attributed the failings of class vehicle chain assemblies to other factors and/or exculpatory conditions for which the defendants had no responsibility.

50. The defendants are estopped from asserting that statutes of limitations were running for the duration of time class members relied on the defendants' fraudulent representations.

51. The defendants are equitably estopped from asserting the statutes of limitations have run against the claims of class members.

Further Allegations

52. The defendants fraudulently, intentionally, negligently and/or recklessly concealed from the proposed class representatives and proposed subclass members the defects in the class engines even though the defendants knew or should have known of design and manufacturing defects in class vehicles if the defendants had adequately tested class engines.

53. The defendants had actual knowledge that design, manufacturing, materials and/or workmanship defects caused extensive irreversible premature damage in class engine chain assemblies shortly after production of the class vehicles commenced.

54. Defendants engaged in extensive field research and quality investigations and analysis before redesigning the specifications for the defective part, rebidding the new part and manufacturing and distributing the new part. In addition, defendants have and continue to be under a legal obligation pursuant to federal law to monitor defects that can cause a safety issue and report them within five (5) days of learning of them. The defendants therefore assiduously monitor the NHTSA-ODI website, their own customer complaint database and the complaints filed therein in order to comply with their reporting obligations under federal law.

55. The defendants failed to inform class vehicle owners prior to purchase or during the express warranty period that their engine primary chain assemblies were defective and would fail shortly after the express warranty period expired. The defendants misrepresented by affirmative conduct and/or by omission and/or by fraudulent concealment the existence of defects in the class engine.

56. The defendants also failed to inform class vehicle owners at the time of purchase that the primary chain assemblies in their class vehicle's engine had been inadequately tested prior to placing the car in production and the time of vehicle sale.

57. The defendants also failed to inform class vehicle owners that there had been several significant subsequent primary chain assembly modifications including design, materials and manufacturing improvements as described in this complaint that reduced and/or eliminated premature chain assembly failure while purchasers' vehicles were within the durational limitation of the express warranty period, including the powertrain limited warranty.⁷ Specifically covered by this powertrain limited warranty were all internal engine parts including the engine chain assemblies. This warranty promised to repair or replace covered defective class engine components arising out of defects in materials and/or workmanship for a period of 4 years or 50,000 miles, whichever occurs first for non-commercial purchasers.

58. The defendants knew in late 2010 or early 2011, and certainly by 2012 (the date the investigation into actual modifications to components in the class engines' chain assemblies commenced) that class engines were experiencing premature engine chain assembly failures. Despite this knowledge, the defendants continued to sell class vehicles with chain assemblies that were defective. This knowledge is imputed to Land Rover because Land Rover LLC was monitoring warranty claims and class vehicle performance in the United States, and reporting back to its parent company located in England.

59. The proposed class representatives and proposed class members had valid and binding warranties and contracts with the defendants and were reasonably expected by the defendants to use their respective class vehicles in the manner in which passenger motor vehicles were used.

⁷ "Every new Land Rover vehicle is covered by a New Vehicle Limited Warranty for 4 years or 50,000 miles, whichever comes first."

60. The proposed class representatives and proposed class members complied with all warranty and contractual obligations including all warranty, warranty notice, maintenance and product use obligations for their respective class vehicles. The proposed class representatives and proposed class members operated their class vehicles under normal anticipated conditions in noncommercial environments.

61. The defendants timely received the proposed class representatives' breach of warranties notice through authorized representative and have suffered no resulting prejudice. Moreover, the proposed class representatives contacted Land Rover LLC directly and/or through an authorized dealership.

62. Each of the proposed class representatives was informed by a representative of Land Rover LLC that Land Rover LLC would not provide assistance in repairing class engines because the vehicles were outside of the express warranty period.

63. The defendants refused to fully reimburse or compensate the proposed class representatives for vehicle repair expenses or provide a suitable substitute or replacement vehicles. Although their respective vehicle's chain assembly failure occurred outside the unilateral express warranty period, the proposed class representatives' class vehicle exhibited unmistakable symptoms (known only by the defendants) of degradation and impending premature failure within the express warranty period.

64. Despite actual and constructive knowledge of class vehicle defects as described in this complaint, the defendants failed to cure class vehicle defects within the express warranty period and thereby breached the terms of the express warranty.

65. Through no fault of their own, the proposed class representatives and proposed class members did not possess sufficient technical expertise to recognize symptoms of impending chain assembly failure. This information, however, was well known to the defendants, but not revealed.

66. The proposed class representatives relied upon material misrepresentations, fraudulent statements and/or material omissions of employees and agents of the defendants at the time of purchase, including but not limited to the useful and expected life of class vehicles and the recommended class vehicle maintenance program.

67. The defendants' misrepresentations and fraudulent statements were received by the proposed class representatives prior to and at the point of their respective class vehicle purchase. These representations were made by Land Rover dealers referencing publications concerning class vehicles including the owner's manual and service and warranty materials.

68. The defendants actively concealed the true reasonably expected duration of class vehicle components, including but not limited to the primary chain assemblies, from the proposed class representatives and all class vehicle purchasers. The defendants intentionally failed to inform class vehicle purchasers that class vehicles incorporated a defective and/or improperly tested primary chain assemblies that would prematurely fail within the reasonably expected useful life of the vehicle.

69. The defendants intentionally failed to inform class vehicle purchasers that the primary chain assemblies incorporated in class vehicles results in higher operational costs than alternative conventional primary chain assemblies or other competitive technology because the primary chain assemblies prematurely fails within the reasonably expected useful life of the vehicle.

70. The defendants actively and fraudulently concealed the existence of class vehicle design and manufacture defects (including defects covered under class vehicle warranties concerning materials and workmanship) and that the owner's manual accompanying class vehicles incorporated improper maintenance recommendations and maintenance intervals.

71. The proposed class representatives and class members did not learn their respective class vehicle was defectively designed and manufactured until after their chain assemblies failed.

72. The defendants' customer service telephone representatives made false and fraudulent representations to class members as to the cause and existence of chain assembly defects in class vehicles although the service representatives received hundreds of consumer complaints that class vehicles prematurely failed.

73. The defendants' employees falsely represented certain conditions for which the defendants were not responsible as the basis for the failures that were in fact caused by a defect in materials, manufacturing and design. They falsely stated that defendants were not responsible for the resulting class vehicle failures and/or denied the existence of known class vehicle defects. These excuses included use of improperly formulated or stale gasoline, incorrect engine oil, driving conditions, lack of proper maintenance and other convenient excuses.

74. Authorized Land Rover dealers did not have knowledge of and/or were counseled not to admit that any defects existed in class vehicles or that improper maintenance recommendations were incorporated in the owner's manual. Land Rover dealers (who also had a vested financial interest in concealing and suppressing the actual cause of class vehicle failures) improperly blamed vehicle failures on certain conditions for which the defendants would not be responsible and/or denied the existence of defects in the primary chain assemblies.

75. The defendants had actual knowledge, constructive knowledge and/or should have known upon proper inquiry and testing that class vehicles were defective with respect to their primary chain assemblies, suffered from extensive irreversible premature performance degradation during the warranty period and did not have a normal and/or reasonable useful life before sales of class vehicles commenced in the United States. This information was technical in nature, proprietary and not known by the ordinary consumer or the public, including the proposed class representatives and proposed class members. The proposed class representatives and proposed class members were ignorant of this technical information through no fault of their own.

76. The defendants acted to conceal the chain assembly defects during the warranty period so that repair costs would be shifted to the proposed class representatives and proposed class members once the warranty expired and the primary chain assemblies failed.

77. Although the defendants knew the timing chain defects in class vehicles caused premature failure of the chain assemblies, the defendants knowingly and actively concealed material information from prospective purchasers and actual purchasers with the intent to deceive purchasers and promote class vehicle sales.

78. The defendants' knowledge of class vehicle timing chain defects was derived from warranty claims, field investigations, claims supervisors, customer complaints and monitoring of performance of class vehicles by Land Rover LLC quality assurance employees. Additionally, the number of replacement components and subsequent component revisions would have placed the defendants on notice of class vehicle defects. Knowledge of class vehicle defects is further imputed to the defendants prior to sale of class vehicles because the predecessor V8 engine (constructed for 2005 to 2009 model year vehicles) to the class engine used substantially similar chain assembly components (including long application gear timing chains) that were also prematurely failing within their reasonably expected life. The defendants elected to place into the stream of commerce class vehicles that they knew would be adversely affected by the failure to adequately design and manufacture the chain assemblies.

79. Material information was fraudulently concealed and/or actively suppressed in order to sell class vehicles to uninformed consumers (including the proposed class representatives and proposed class members) premised on affirmations and representations of reliable, high quality, long-life vehicles with low maintenance, inexpensive operating costs, superior performance and durability. In fact, class vehicles actually contained known chain assembly defects that would severely affect the useful life of the vehicle.

82. The defendants had a duty to disclose to class vehicle owners that there were materials and manufacture defects in class vehicles and that the owner's manuals set forth the wrong maintenance recommendations and maintenance intervals.

84. This duty arose because the defendants knew that there were defects in the vehicles and inaccuracies in the owner's manuals that affected vehicle operation and safety while class vehicle owners were not, and could not reasonably be cognizant of these defects and dangers.

85. The defendants continuously and affirmatively concealed the actual characteristics of class vehicles from the proposed class representatives and other purchasers. The defendants breached their affirmative duty of disclosure to class vehicle owners (and particularly to owners who inquired as to the cause of class vehicle failures).⁸

86. The defendants breached express and implied warranties and actively and affirmatively misrepresented, fraudulently concealed and suppressed, both pre-sale and post-sale, the existence of defects in class vehicles and omissions in accompanying owner's manual and warranty and maintenance materials.

87. The warranties accompanying class vehicles were procedurally and substantively unconscionable under the Uniform Commercial Code § 2-302⁹ and other applicable state warranty laws because of the disparity in bargaining power of the parties, the purchasers' lack of knowledge that class vehicles were defective, the inability of class vehicle purchasers to bargain with the defendants to increase durational warranties, their lack of knowledge, their lack of meaningful alternatives, disparity in sophistication of the parties, unfair terms in the warranty (including but not limited to durational warranties that unfairly favored the defendants particularly where there were class vehicle defects

⁸ Since unexpected engine failure is a serious safety issue, the defendants had an affirmative duty to disclose the vehicle defects together with associated risks.

⁹ The equivalent New Jersey statute is N.J. Stat. Ann. §12A:2-302; in Florida it is Florida St. Ann. § 672.302; and in Washington state it is Wash. Rev. Code Ann. § 62A.2-302.

known only to the defendants and the warranty unfairly shifted repair costs to consumers when class vehicles prematurely fail during their reasonably expected life), absence of effective warranty competition and the fact that class vehicles fail with substantially fewer miles of operation than competitive vehicles from other manufacturers or models identical to class vehicles except for an engine with a belt driven valve train rather than the class engine chain driven valve train.

88. Purchasers of class vehicles reasonably expect vehicles to function well in excess of the class vehicles' durational warranties before requiring extensive expensive repairs. This is particularly true where the purchasers of class vehicles were led to believe by the defendants' representations and typical consumer expectations in a commercial context that the useful expected life of the vehicles was 100,000 miles.

89. Given the conduct of the defendants and the design, manufacture, materials and workmanship defects in class vehicles (that the defendants knew were inherently defective prior to the time of sale as well as post-sale), the durational limitations of the warranties are oppressive, unreasonable and unconscionable because the warranty disclaimers of the proposed class representatives and proposed class members were neither knowing nor voluntary.

90. The proposed class representatives and proposed class members had an absence of any meaningful choice in the purchase of class vehicles and the contractual terms were unreasonably favorable to the defendants since the defendants were fully aware of defects in the class vehicles that substantially reduced the expected useful life of the vehicle. The proposed class representatives and proposed class members were unaware of defects in the class vehicles at the time of purchase.

91. The bargaining position of the defendants for the sale of class vehicles was grossly disproportionate and vastly superior to that of individual vehicle purchasers, including the proposed class representatives and proposed class members. This is because the defendants knew there were defects in class vehicles affecting the durational operation and operating costs.

92. The defendants included unfair contractual provisions concerning the length and coverage of the express warranty when they knew that class vehicles were inherently defective and dangerous and had been inadequately tested.

93. The defendants knew defects in class vehicle components would cause certain expensive repair failures within one-half of the useful expected life of the vehicle. The defendants artificially limited the duration of the warranty period to avoid performing warranty repairs in order to maximize profits through the sale of defective vehicles.

94. The defendants unconscionably sold defective class vehicles to the proposed class representatives and proposed class members without informing these purchasers that the class vehicles were defective. In the alternative, the defendants failed to notify the proposed class representatives and proposed class members after the time of sale that the primary chain assemblies had been redesigned and that the assemblies in their respective vehicles should be replaced prior to the expiration of the warranty.

95. The defendants' conduct renders the vehicle purchase contract so one-sided as to be unconscionable under the circumstances existing at the formation of the vehicle purchase contract.

96. The durational limitation of the express warranties accompanying the class vehicles is unreasonable and unconscionable since the defendants actively concealed known vehicle defects and issued incorrect maintenance recommendations and maintenance intervals. The proposed class representatives and proposed class members had no notice of or ability to detect the defects.

97. The defendants restricted the limited power train warranty (including the class engine) duration to 4 years or 50,000 miles (whichever occurs first) for class vehicles in an effort to avoid the cost of repairs because they were cognizant of class vehicle defects that existed at the time of sale.

98. Engines in competitive vehicles manufactured and sold at the time the class vehicles were manufactured and sold ordinarily last longer than warranted by the limited power train warranty accompanying class vehicles.

99. The defendants engaged in unconscionable fraudulent commercial practices and attempted to conceal class vehicle materials defects, workmanship defects, manufacturing defects, design defects and improperly recommended maintenance.

100. The defendants are engaged in a continuing fraud concerning the true underlying cause of class vehicle failures.

101. The defendants failed to adequately test class vehicles in appropriate consumer environments prior to marketing, distribution and sale.

102. The defendants' unconscionable conduct precludes any exclusion of incidental and consequential damages or any other limitation of remedies. The defendants' upper level management orchestrated this wrongful conduct.

103. The proposed class representatives and proposed class members operated and maintained their class vehicles in conformity with the respective owner's manuals and provided the requisite notice to the defendants' authorized agents for warranty repair after their class vehicles failed.

104. The proposed class representatives and proposed class members have not received the benefit of their bargain concerning their respective purchase of class vehicles.

106. The defendants are persons within the context of the consumer protection laws of New Jersey together with all other states and committed wrongful conduct described in this complaint including conduct that caused ascertainable financial harm and/or economic loss to the proposed class representatives and proposed class members.

107. The defendants created an over-all misleading impression through their failure to disclose material information concerning the fact that class vehicles incorporated defective chain assemblies

and were accompanied an owner's manual and service and warranty materials that incorporated incorrect engine service and maintenance recommendations. The proposed class representatives and proposed class members were deceived by the defendants' conduct as described in this complaint with respect to their purchase of class vehicles.

108. The defendants violated the consumer protection laws of New Jersey, Florida and Washington state, together with all other states with their unfair, oppressive and unconscionable conduct described in this complaint including but not limited to their failure to disclose material information that caused ascertainable financial harm to proposed class members and proposed class members.

109. The defendants were under a duty to disclose safety defects to class vehicles as described in this complaint but failed to disclose to the proposed class representatives and proposed class members the characteristics of class vehicles with respect to defects in violation of the consumer protection laws of New Jersey, Florida and Washington state together with all other states. The defendants' omissions (that class engines were defective and that this defect constituted a safety hazard) deceived purchasers (including but not limited to the proposed class representatives and proposed class members). Those disclosure omissions include the fact that class vehicle defects had a significant impact on the value, durability and future care of class vehicles. This failure to disclose additional information concerning class vehicle defects had the capacity to, and in fact did, deceive purchasers (including but not limited to the proposed class representatives and proposed class members) in a material respect.

110. If the proposed class representatives and proposed class members had been made aware of the defects in their respective class vehicles and the attendant ramifications of value, durability, maintenance expenses, safety and care, they would not have purchased the class vehicles or would have paid less for their vehicles since class members were led to believe that they were purchasing a

vehicle that was free of major defects and were not fully informed of the true characteristics and attributes of class vehicles.

111. The defendants fraudulently, intentionally, negligently and/or recklessly concealed from the proposed class representatives and proposed class members defects in class vehicles even though the defendants knew or should have known information concerning these defects was material and central to the marketing and sale of class vehicles to prospective purchasers including the proposed class representatives and proposed class members.

112. The defendants violated the consumer protection laws of New Jersey, Florida and Washington state together with all other states by failing to inform class vehicles owners at the time of purchase that class vehicles had known defects, that the vehicles would prematurely require major engine repairs and/or prematurely fail with resulting catastrophic failure and/or would have a significant effect on the vehicle's value.

113. The wrongful conduct of the defendants in violation of the consumer protection laws of New Jersey together with all other states occurred within the limitations period set out in the respective statutes and/or the limitations period is tolled by the defendants' conduct.

What the Omissions Were:

115. The defendants fraudulently omitted to disclose material facts basic to both the purchase and warranty service concerning class vehicles, including information concerning class engine chain assemblies defects, in an effort to deceive purchasers as described in ¶¶ 3-10, 33-44 and 52-114 of this complaint and elsewhere.

116. At the time of purchase, the defendants fraudulently omitted to disclose material matter regarding the defects in class vehicles, including their impact on future repairs, costs and vehicle reliability. The defendants fraudulently concealed from the proposed representative and proposed class members defects in class vehicles even though the defendants knew or should have known that

information concerning these defects was material and central to the marketing and sale of class vehicles to prospective purchasers, including the proposed class representatives and proposed class members.

117. The primary chain tensioning assemblies in class engines are defective and prematurely fail as described in this complaint. These scenarios pose a serious safety issue while the vehicle is being operated since there is loss of engine power without warning, loss of power-assisted steering and reduced braking caused by lack of engine vacuum. In other instances, the engine may fail to start, leaving the driver and passenger stranded mid-journey.

118. The defendants concealed from proposed representatives and proposed class members during their warranty periods that a defect existed with the chain assemblies which could have and should have been fixed during the warranty period, particularly as it was a safety issue, and defendants' withholding of this material information deprived proposed representative and proposed class members of the right to have such defective part replaced for free under the warranty.

The Person(s) Responsible for the Failure to Disclose:

119. The proposed class representatives and proposed class members are entitled to the reasonable inference that the defendants' sales, marketing, engineering and warranty departments and their executives were involved in the omissions.

The Context of the Omissions and the Manner in which they Misled:

120. Material information was fraudulently concealed and/or actively suppressed in order to sell class vehicles to uninformed consumers (including the proposed class representatives and proposed class members) premised on affirmations and representations as described in this complaint.

121. If the proposed class representatives and proposed class members had been informed of defects in their class vehicles, they would not have purchased their respective class vehicles or would have paid substantially less. If the proposed class representatives and proposed class members had

been made aware of the defects in their respective class vehicles and the attendant ramifications of their respective vehicle's future cost of repairs, durability and care, they would not have purchased the class vehicles since each class member believed they were purchasing vehicles without major defects and were not fully informed of true characteristics and attributes of class vehicles. If the proposed class representatives and proposed class members had been informed of the defect during the warranty period, they would have had the defective part replaced under warranty. The defendants' conduct that violated the consumer fraud statutes alleged herein deprived proposed representative and proposed class members of that remedy.

What the Defendants Obtained through the Fraud:

122. Material information concerning class vehicles was concealed and/or actively suppressed in order to protect the defendants' corporate profits from loss of sales, purchase refunds, warranty repairs, adverse publicity and limit brand disparagement. Purchasers believed they were obtaining vehicles as having different attributes than described and purchased and were accordingly deprived of economic value and paid a price premium for their class vehicles. The defendants had a uniform policy of not properly disclosing class vehicle defects in order to promote sales and increase profits as described in this complaint.

123. As a proximate and direct result of the defendants' unfair and deceptive business trade practices, the proposed class representatives and proposed class members purchased class vehicles and sustained an ascertainable loss, including but not limited to financial harm as described in this complaint.

COUNT I
BREACH OF UNIFORM COMMERCIAL CODE § 2-313: EXPRESS WARRANTY
BY THE DEFENDANTS RESULTING IN FINANCIAL HARM

(On Behalf of the Nationwide Class or, Alternatively, the
New Jersey, Florida and Washington Subclasses)

124. The proposed class representatives and proposed class members incorporate by reference all allegations in the above preceding paragraphs as if set forth fully in this count.

125. The defendants are merchants with respect to passenger motor vehicles. Class vehicles are goods within the meaning of the Uniform Commercial Code as adopted by the states of New Jersey, Florida and Washington.

126. The proposed class representatives and proposed class members have established sufficient direct dealings, including but not limited to vehicle purchase, with the defendants or their agents (dealerships and technical support) to establish privity of contract with the defendants.

127. The defendants provided class members with an express powertrain limited warranty of 4 years or 50,000 miles whichever occurs first, from date the vehicle was first placed in service. Specifically covered by this powertrain-limited warranty were all internal engine parts including the engine chain assemblies. This warranty promised to repair or replace covered defective class engine components arising out of defects in materials and/or workmanship for a period of 4 years or 50,000 miles, whichever occurs first for non-commercial purchasers.

128. The defendants expressly warranted to the general public, owners and lessees of class vehicles that class vehicles were merchantable and fit for the ordinary purposes for which passenger vehicles are used. The defendants are merchants with respect to passenger motor vehicles. The proposed class representatives and proposed class members purchased their respective vehicles for personal, family, and/or household use and did not engage in commercial use of their vehicles.

129. The defendants extensively advertised that class vehicles were superior in construction and extolled the quality and virtues of these vehicles including superior design and manufacture,

safety, durability, reliability and performance when in fact class vehicle engines contained known defects in the primary chain assemblies as described in ¶¶ 3-10, 33-44 and 52-118 of this complaint and elsewhere that severely reduced the useful life of the vehicle.

130. The defendants represented that class vehicles were of a particular standard or quality, as described in this complaint, when they, in fact, were not. Timing chain assemblies in class engines are failing far short of the expected useful life, particularly in a high-end luxury automobile advertised for its rugged dependability even in off-road environments, as was the case with Land Rovers.

131. The proposed class representatives and proposed class members were not presented with an opportunity to review (let alone bargain for) the warranty provisions at the time of purchase of their class vehicles and were unaware of the defects in the primary chain assemblies of class vehicle engines that made the respective bargaining position of the parties unequal at the time of vehicle purchase.

132. The defendants' representations (including representations made by employees of authorized retail dealers relying on specification and sales materials generated by the defendants) were made in newspapers, magazines, engine and Internet advertising together with sales literature viewed by the proposed class representatives and proposed class members.

133. The defendants received adequate notice of their breach of their express warranties and failed to cure the warranty breaches. The proposed class representatives and class members reported to the defendants the problems with and failings of the primary chains in their vehicles and requested of defendants that they cure and/or repair and/or replace the defective chain components. In the alternative, the proposed class representatives, as indirect purchasers, were not required to issue notice of the warranty breach to the defendants and the lack of notice of warranty breach did not result in any prejudice to the defendants.

134. The proposed class representatives and proposed class members complied with maintenance recommendations for their respective class vehicle.

135. The defendants failed to remedy by replacement or repair the proposed class representatives' chain assemblies that were defective in materials and workmanship during the express warranty period although these defects were known to the defendants at that time.¹⁰ Class vehicles owned by the proposed class representatives and proposed class members also prematurely failed and/or experienced substantial performance diminution within the express warranty period of 4 years/50,000 miles.

136. The proposed class representatives and proposed class members relied on the express warranties made by the defendants regarding the class vehicles on choosing to purchase their Land Rover vehicles. As a result, they sustained an ascertainable loss in the purchase price of their vehicles and other financial injury, including the cost for the chain assembly repairs, resulting from the breach of those warranties by the defendants.

137. Because of the chain assembly defects, class vehicles are not reliable and owners of these vehicles have lost confidence in the ability of class vehicles to perform the function of safe reliable transportation.

138. The proposed class representatives and proposed class members could not have reasonably discovered the defective condition of their class vehicle engines prior to failure.

139. The express warranty remedy set out in the warranty provisions of class vehicles fails of its essential purpose under Uniform Commercial Code § 2-719(2) and the limitation of consequential damages is unconscionable under § 2-719(3) because of the conduct of the defendants described, *supra*.

140. The defendants breached their express warranties in that class vehicles were defective with respect to engine materials, workmanship, design and manufacture. The defendants further breached

¹⁰ The service and warranty materials for class vehicles provide for repair or replacement of engine components defective in materials and/or workmanship within the New Vehicle Limited Warranty period of 4 years or 50,000 miles, whichever comes first.

their express warranties in that the class vehicles were accompanied by an owner's manual and service and warranty materials that incorporated no inspection and service intervals for the primary chain assemblies although the defendants knew these components were defective and required periodic inspection and service.

141. The defendants further breached their express warranties by failing to remedy the chain assembly defects caused by defects in materials and workmanship as required by the warranty that accompanied the respective class vehicles. Class vehicles were not of merchantable quality and were unfit for the ordinary purposes for which passenger vehicles are used because of engine materials, workmanship, design and manufacture defects which cause engine failure and failure to perform as warranted.

142. The proposed class representatives and proposed class members relied on express warranties made by the defendants concerning the class vehicles and sustained financial injury resulting from the breach of those warranties by the defendants.

143. The proposed class representatives and proposed class members could not have reasonably discovered the defective condition of the class vehicles. The defendants' breach of their express warranties was the direct and proximate cause of the proposed class members' financial harm.

144. Wherefore, the proposed class representatives and proposed class members demand judgment against defendants for multiple damages, interest, costs and attorneys' fees.

COUNT II
BREACH OF UNIFORM COMMERCIAL CODE § 2-314: IMPLIED
WARRANTY OF MERCHANTABILITY BY THE DEFENDANTS
(On Behalf of the Nationwide Class or, Alternatively,
the New Jersey, , Florida and Washington Subclasses)

145. The proposed class representatives and proposed class members incorporate by reference all allegations in the above preceding paragraphs as if set forth fully in this count.

146. The defendants are merchants with respect to passenger motor vehicles. Class vehicles are goods within the meaning of the Uniform Commercial Code as adopted by New Jersey, Florida and Washington.

147. The defendants failed to provide legally binding written notice to the proposed class representatives and other class vehicle purchasers of implied warranty exclusions at time of purchase because the warranty exclusion failed to mention merchantability and was not conspicuous within the meaning of § 2-316 and therefore ineffective by law.

148. The defendants impliedly warranted to the general public, owners and lessees of class vehicles that the class vehicles were merchantable and fit for the ordinary purposes for which passenger vehicles are used. The proposed class representatives and proposed class members purchased their respective vehicles for personal, family, and/or household use and did not engage in commercial use of their vehicles.

149. As manufacturers of consumer goods, the defendants are precluded from excluding or modifying an implied warranty of merchantability or limiting consumer remedies for breach of this warranty.

150. To the extent privity of contract is required for purposes of the application of implied warranty, the proposed class representatives and proposed class members are third-party beneficiaries to a contract implemented by the defendants that creates an implied warranty of merchantability.

151. The defendants breached their implied warranties in that class vehicles were defective with respect to engine design and manufacture as described in this complaint and were unfit for the ordinary purposes for which passenger vehicles are used because of those defects which caused premature primary chain assemblies failure and consequent damage to the engine.

152. Class vehicles are predisposed to premature failure in normal anticipated operating environments because of engine materials, workmanship, design and manufacture defects described in this complaint that existed at the time these vehicles were manufactured.

153. Class vehicles are not reliable and owners of these vehicles have lost confidence in the ability of class vehicles to perform the function of safe reliable transportation without the likelihood of unanticipated sudden catastrophic engine failure. The defendants are estopped by their conduct, as described in this complaint, from disclaiming any and all implied warranties with respect to the chain assemblies in class engines.

154. The proposed class representatives and proposed class members relied on implied warranties of merchantability made by the defendants regarding the class vehicles in choosing to purchase their respective class vehicles and sustained an ascertainable financial injury resulting from the breach of those warranties by the defendants.

155. The defendants received adequate notice of their breach of the implied warranty of merchantability through the proposed class representatives and proposed class members' requests for repair or replacement. In the alternative, class vehicle owners, as indirect purchasers, were not required to issue notice of the warranty breach to the defendants and any lack of notice of warranty breach did not result in any prejudice to the defendants. The defendants declined to offer the proposed class representatives an effective remedy for their defective class engine or vehicle.

156. Even though the proposed class representatives and proposed class members complied with class vehicle engine maintenance recommendations for their respective class vehicles, their respective class vehicle engines prematurely failed because of defects in the primary chain assemblies.

157. The proposed class representatives and proposed class members reasonably relied upon the expertise, skill, judgment and knowledge of the defendants and upon their implied warranty that class vehicles were of merchantable quality and fit for their intended use. Class vehicles did not

conform to the defendants' implied representations or warranties because of defects in the chain assemblies were less reliable and more expensive to maintain than previous or current model Land Rovers or competitor vehicles.

158. The proposed class representatives and proposed class members had an independent legitimate consumer expectation that the class vehicles would last up to 10 years and 100,000 miles before requiring any major engine repairs based on industry standards, the defendant's publications and other publications, competitor products, consumer product magazines, prior vehicle ownership and reputation of the defendants for manufacturing durable quality vehicles. There were no statements made by the defendants or their agents that contradicted or led consumers to lower their legitimate expectations at the time of purchase.

159. The proposed class representatives and proposed class members could not have reasonably discovered the defective condition of the class vehicles because the class engine defects were inside of the engine. The defendants' breach of their implied warranties of merchantability was the direct and proximate cause of the proposed class representatives' and proposed class members' financial harm. Had the class vehicles not contained defective and failing chain assemblies, the proposed class representatives and proposed class members would not have incurred the costs of engine repair.

160. Wherefore, the proposed class representatives and proposed class members demand judgment against defendants including multiple damages, interest, costs and attorneys' fees.

COUNT III
VIOLATION OF MAGNUSON-MOSS WARRANTY ACT, 15 U.S.C. § 2310(d)(1)(A)
(On Behalf of the Nationwide Class or, Alternatively,
the New Jersey, Florida and Washington Subclasses)

174. The proposed class representatives and proposed class members incorporate by reference all allegations in the above preceding paragraphs as if set forth fully in this count.

175. This claim is brought as a state law claim under 15 U.S.C. §2310(d)(1)(A) and is before

this Court as a supplemental state court claim for each of the states pursuant to diversity jurisdiction under CAFA.

176. The proposed class representatives and proposed class members are consumers within the context of the Magnuson-Moss Warranty Act, 15 U.S.C. § 2301(3).

177. Class vehicles are consumer products within the context of the Magnuson-Moss Warranty Act, 15 U.S.C. § 2301(1).

178. The defendants are suppliers and/or warrantors within the context of the Magnuson-Moss Warranty Act, 15 U.S.C. § 2301(4)-(5).

179. The defendants' express warranties are written warranties within the context of the Magnuson-Moss Warranty Act, 15 U.S.C. § 2301(6). Class vehicle implied warranties created by operation of state law are incorporated into the Magnuson-Moss Warranty Act as modified by § 2308.

180. The defendants breached the express and implied warranties accompanying class vehicles as described in this complaint.

181. The Magnuson-Moss Warranty Act provides a claim for any consumer who is damaged by the failure of a warrantor to comply with a written or implied warranty.

182. The defendants' breach of their express and implied warranties was the direct and proximate cause of the proposed class representatives and proposed class members' financial harm as more fully set out in the preceding warranty counts, and constitutes a violation of the Magnuson-Moss Warranty Act.

183. The proposed class representatives and proposed class members have alleged in this complaint sufficient direct dealings with the defendants or their agents (dealerships and technical support) to establish privity of contract with the defendants. In the alternative, privity of contract is not required because the proposed class representatives and proposed class members are intended third-party beneficiaries of contracts between the defendants and its dealers, specifically including implied

warranties. Authorized class vehicle dealers were not intended to be the ultimate consumers of class vehicles and have no rights under the warranty provisions accompanying class vehicles since these provisions were drafted and intended to benefit the consumer purchasers of class vehicles.

184. Affording the defendants a reasonable opportunity to cure their breach of written warranties for class vehicles would be unnecessary and futile. The proposed class representatives and proposed class members have already attempted to secure coverage for their primary chain assemblies and related repairs without success from the defendants.

185. At the time of sale or lease of each class vehicle, the defendants knew, should have known, or were reckless in not knowing of their misrepresentations and omissions concerning the class vehicles' inability to perform as warranted, but nonetheless failed to rectify the situation and/or disclose the defects as described in this complaint. Under the circumstances, the remedies available under any informal settlement procedure would be inadequate and any requirement that class vehicles resort to an informal dispute resolution procedure and/or afford the defendants a reasonable opportunity to cure their breach of warranties is excused and thereby deemed satisfied.

186. The proposed class representatives and proposed class members would suffer economic hardship if they returned their class vehicles but did not receive the return of all payments made by them.

187. Wherefore, the proposed class representatives and proposed class members demand judgment against the defendants including multiple monetary damages, interest, costs and attorney's fees.

COUNT IV
VIOLATION OF THE NEW JERSEY CONSUMER FRAUD ACT (“NJCFA”)
N.J. STAT. ANN. §§ 56:8-2 *ET SEQ.*
(On Behalf of a Nationwide Class or alternatively the New Jersey Subclass)

188. Plaintiff Schmidt incorporates by reference all allegations in the above preceding paragraphs as if set forth fully in this count.

189. Plaintiff Schmidt asserts this count on behalf of himself and proposed New Jersey subclass members.

190. The NJCFA prohibits “[t]he act, use or employment by any person of any unconscionable commercial practice, deception, fraud, false pretense, false promise, misrepresentation, or the knowing, concealment, suppression, or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale or advertisement of any merchandise or real estate, or with the subsequent performance of such person as aforesaid, whether or not any person has in fact been misled, deceived or damaged thereby, is declared to be an unlawful practice . . . ” N.J. Stat. Ann. § 56:8-2.

191. Plaintiff Schmidt and the Classes defined herein (e.g., the nationwide class or, alternatively, the New Jersey Class) are consumers/persons who purchased or leased class vehicles for personal, family, or household use. The defendants are persons engaged in trade or commerce with respect to merchandise within the context of NJCFA.

192. In violation of the NJCFA, defendants employed unconscionable commercial practices, deception, fraud, false pretense and/or false promise by providing class vehicles that contain class engine defects described in this complaint and present an undisclosed safety risk to drivers and occupants of the class vehicles. Further, defendants misrepresented the standard, quality or grade of the class vehicles that were sold or leased with the latent known defects and/or knowingly failed to disclose the existence class engine defects described in this complaint and corresponding safety risk in

violation of the NJCFA which were material to a reasonable consumer. The defendants fraudulently, intentionally, negligently, and/or recklessly misrepresented to the plaintiff Schmidt and proposed New Jersey subclass members the required maintenance and/or maintenance intervals of class vehicle engines, including but not limited to the primary chain assemblies.

193. Defendants' misrepresentations and fraudulent omissions were material to plaintiff Schmidt and members of the Class and/or New Jersey subclass. When Schmidt and members of the Class and/or New Jersey subclass purchased or leased their class vehicles, they reasonably relied on the expectation that the class vehicles' primary chain assemblies would last beyond the warranty periods without need for repair or replacement and would not pose an unavoidable safety risk. Had defendants disclosed that the primary chain assemblies were prone to premature failure and/or an unavoidable safety risk, Schmidt and members of the Class and/or New Jersey subclass would not have purchased or leased the class vehicles, or would have paid less for their vehicles. Further, had defendants disclosed that the class engine primary chain assemblies would not last beyond the warranty periods without need for repair or replacement, Schmidt and members of the Class and/or New Jersey subclass would have demanded repair or replacement during the warranty periods at no cost to Schmidt and members of the Class and/or New Jersey subclass as provided for in defendants' warranties.

194. Defendants knowingly concealed, suppressed and/or omitted to disclose the existence of the class engine primary chain assembly defects and safety risk in the class vehicles at the time of sale or lease and at all relevant times thereafter. The defendants also fraudulently, intentionally, negligently and/or recklessly misrepresented to the plaintiff Schmidt and proposed New Jersey subclass members the characteristics of class vehicle engines with respect to material, manufacture, durability, design, longevity, maintenance and operating costs. The defendants extensively advertised that class vehicles were superior in construction and extolled the quality and virtues of class vehicles,

including superior materials, workmanship, design, manufacture, safety, durability, reliability and performance. In fact, class engines contained a known defect as described in this complaint that caused class engines to prematurely fail.

195. Defendants knew since late 2010 or early 2011 that the class engine defects described in this complaint would cause the chain assemblies to fail before the useful life of the engine and unconscionably limited the manufacturer's warranty coverage so that the primary chain assembly would fail beyond the warranty periods, thereby unlawfully transferring the costs of repair of these components to the plaintiff Schmidt and members of the Class and/or New Jersey subclass. Further, defendants unconscionably marketed the class vehicles to uninformed consumers in order to maximize profits by selling class vehicles containing the undisclosed latent defect and corresponding safety risk.

196. Defendants owed a duty to disclose the class engine defects described in this complaint and its corresponding safety risk to Schmidt and members of the Class and/or New Jersey subclass because defendants possessed superior and exclusive knowledge regarding the defect and the risks associated with primary chain assembly failure. Rather than disclose the defects, defendants intentionally concealed the defect with the intent to mislead Schmidt and members of the Class and/or New Jersey subclass in order to sell class vehicles and wrongfully transfer the cost of repair or replacement of the defective components or failed engine. The defendants actively suppressed the fact that class engines were prematurely failing because of materials, workmanship, design and manufacture defects, as well as incorrect maintenance recommendations and maintenance intervals.

197. As set forth in ¶¶ 35-36, 41-45, 57-58, 73-78 with particularity (and incorporated herein by reference), defendants knew, or should have known, as early as late 2010 or early 2011, that the primary chain assembly defects in class vehicles would cause catastrophic engine failure leading to a loss of engine power while the vehicle was operating. Further, defendants knew, or should have known, that such loss of power would cause class vehicles to become involved in rear-end collisions or

other accidents, putting vehicle operators, passengers, and other motorists at risk for injury. The defendants actively suppressed the fact that class engines were prematurely failing because of materials, workmanship, design and manufacture defects, as well as incorrect maintenance recommendations and maintenance intervals. Although the defendants knew defects in class engines and misinformation in the owner's manuals were causing premature class engine failures, the defendants unconscionably denied any liability and attempted to shift the responsibility and cost for repairs to individual vehicle owners. In certain instances, the defendants secretly repaired some class engine to prevent dissemination of knowledge concerning class engine defects.

198. Had Schmidt and members of the Class and/or New Jersey subclass known about the class engine defects described in this complaint at the time of purchase, including the safety hazard posed by the defect and the monetary cost of repair, they would not have bought the class vehicles or would have paid much less for them.

199. As a direct and proximate result of defendants' wrongful conduct in violation of the NJCFA, Schmidt and members of the Class and/or New Jersey subclass have suffered and continue to suffer harm by the threat of sudden and unexpected failure of the primary chain assemblies and/or actual damages in the amount of the cost to replace the defective assemblies including other essential engine parts and/or the entire engine. In the case of plaintiff Schmidt, he incurred financial damages of more than \$4,500.00 (exclusive of vehicle rental) to replace the failed chain assemblies in his class engine. The engine failure was directly and proximately caused by the defendants' violation of the NJCFA.

200. The defendants' deceptive trade practices were likely to deceive a consumer acting reasonably under the circumstances which plaintiff Schmidt and proposed New Jersey subclass members were caused to suffer ascertainable damages by expending sums of money in purchasing and later repairing their class vehicles. As reasonable consumers, plaintiff Schmidt and proposed Class

and/or New Jersey subclass members had no reasonable way to know that class vehicles contained chain assemblies which were defective in materials, workmanship, design and manufacture. Any reasonable consumer under the circumstances would have relied on the representations of the defendants who alone possessed the knowledge as to the quality and characteristics of the class vehicles, including the engine and chain assembly durability.

203. If the defendants had not concealed class engine defects from plaintiff Schmidt and proposed Class and/or New Jersey subclass members within the express warranty period, class engines would have been repaired without cost to purchasers as promised under the original warranty.

204. The defendants fraudulently concealed unmistakable manifestations of impending class engine failures within the express warranty period without inspecting, repairing or replacing damaged internal class engine components.

205. The defendants violated the NJCFA by failing to inform class vehicle owners prior to purchase and/or during the warranty period that class engines were defective in materials, workmanship, design and manufacture and were accompanied by incorrect maintenance recommendations and maintenance intervals.

206. The defendants violated the NJCFA by failing to inform class vehicle owners prior to purchase and/or during the warranty period that class engines contained defects and would require regular replacement of expensive internal engine components such as the primary chain assemblies.

207. The defendants further violated the NJCFA by failing to inform prospective class vehicle purchasers that the defendants had not properly tested the engines including but not limited to the chain assemblies.

208. The defendants committed unfair and deceptive business trade act practices as described in this complaint. The defendants repeatedly violated the NJCFA on multiple occasions with their continuous course of conduct including omissions of material fact and misrepresentations concerning

inter alia, the causes of the failures of class engines owned by Schmidt and proposed Class and/or subclass members.

209. The secret warranty programs for class engines initiated by the defendants and other wrongful conduct of the defendants in violation of NJCFA occurred within the limitations period set out in the statute and/or is tolled by the defendants' conduct.

210. As a proximate and direct result of the defendants' unfair and deceptive business trade practices, plaintiff Schmidt and proposed Class and/or New Jersey subclass members purchased class vehicles and sustained an ascertainable loss and financial harm.

211. Plaintiff Schmidt and proposed Class and/or New Jersey subclass members experienced premature class engine failure, increased repair and maintenance costs and incurred other substantial monetary damages and inconvenience.

212. The conduct of the defendants offends public policy as established by statutes and common law; is unethical, oppressive and/or unscrupulous and caused unavoidable substantial injury to class vehicle owners (who were unable to have reasonably avoided the injury due to no fault of their own) without any countervailing benefits to consumers and therefore constitutes an unconscionable commercial practice.

213. Wherefore, plaintiff Schmidt and proposed Class and/or New Jersey subclass members demand judgment against the defendants for restitution, disgorgement, statutory and actual monetary damages, interest, costs, attorneys' fees and injunctive relief including a declaratory judgment and an appropriate court order prohibiting the defendants from further deceptive acts and practices described in this complaint.

COUNT V
VIOLATION OF FLORIDA DECEPTIVE AND UNFAIR TRADE PRACTICES ACT
(“FDUTPA”) FLA. STAT. §§ 501.201 *ET SEQ.*
(On Behalf of Plaintiff Adams and the Florida Subclass)

235. Plaintiff Adams and proposed Florida class members incorporate by reference all allegations in the above preceding paragraphs as if set forth fully in this count.

236. Plaintiff Adams bring this claim on behalf of themselves and members of the Florida subclass.

237. Section 501.204 of the FDUTPA prohibits “[u]nfair methods of competition, unconscionable acts or practices” and “unfair or deceptive acts or practices in the conduct of any trade or commerce.”

238. Plaintiff Adams and members of the Florida subclass are “consumers” and “interested parties or persons” under § 501.203(6) and (7) of the FDUTPA.

239. Defendants are engaged in the conduct of “trade or commerce” as defined by § 501.203(8) of the FDUTPA.

240. One of the primary purposes of the FDUTPA and § 501.202(2) in particular is to “protect the consuming public” from “those who engage in unfair methods of competition, or unconscionable, deceptive, or unfair acts or practices in the conduct of any trade or commerce.”

241. Defendants committed unfair or deceptive acts or practices, affirmative misrepresentations, material omissions and/or otherwise violated the FDUTPA. Defendants intentionally and knowingly misrepresented the standard, quality or grade of the class vehicles and intentionally and knowingly failed to disclose and concealed class engine primary chain assembly defects. Defendants’ misrepresentations of the standard, quality or grade of class vehicles and failure to disclose the chain assembly defects constitute unfair acts or practices in violation of the FDUTPA

because these acts offend public policy, are immoral, unethical, oppressive, or unscrupulous and/or cause substantial injury to consumers.

242. Defendants knew or should have known that the class vehicles were defective at the time of sale or lease and that the class engine chain assemblies would fail before the useful life of the engine. Given the latent nature of the defect, defendants knew, or should have known, that the majority of chain assembly failures would occur outside of the coverage periods of the manufacturer's warranties.

243. Defendants knew, or should have known, that the chain assembly defects in the class vehicles could cause catastrophic engine failure leading to a loss of engine power while the vehicle was operating. Further, defendants knew, or should have known, that such loss of power could cause the class vehicles to become involved in rear-end collisions or other accidents, putting vehicle operators, passengers, and other motorists at risk for injury.

244. Defendants owed a duty to disclose chain assembly defects and its corresponding safety risk to Adams and members of the Florida subclass because the defendants possessed superior and exclusive knowledge regarding the defects and the risks associated with the chain assembly failure. Rather than disclose the defect, defendants engaged in deceptive trade practices in order to sell additional class vehicles and wrongfully transfer the cost of repair or replacement of engine chain assemblies to Adams and members of the Florida subclass.

245. Defendants have knowingly and willfully engaged in the unfair and deceptive trade practices. Further, defendants unconscionably marketed class vehicles to uninformed consumers in order to maximize profits by selling additional class vehicles containing the undisclosed latent defect and corresponding safety risk.

246. Defendants' unfair or deceptive acts or practices, affirmative misrepresentations and/or material omissions regarding the chain assembly defects were likely to mislead a reasonable consumer

and misled Adams and members of the Florida subclass. When Adams and members of the Florida subclass purchased or leased their class vehicles, they reasonably relied on the reasonable expectation that the class vehicles' engine chain assemblies would last beyond the warranty periods without need for repair or replacement and would not pose an unavoidable safety risk.

247. Had defendants disclosed that class engine chain assemblies were prone to premature failure and/or an unavoidable safety risk, Adams and members of the Florida subclass would not have purchased or leased the class vehicles, or would have paid less for their respective vehicles. Further, had defendants disclosed that the chain assemblies in class engines would not last beyond the warranty periods without need for repair or replacement, Adams and members of the Florida subclass would have demanded repair or replacement during the warranty periods at no cost—as provided for in defendants' warranties.

248. Defendants' unfair and/or deceptive acts or practices, affirmative misrepresentations and/or material omissions regarding the chain assembly defects and corresponding safety risk are substantially injurious to consumers. As a direct and proximate result of defendants knowing, intentional concealment of the chain assembly defects in violation of the FDUTPA, proposed Florida class representative Adams and members of the Florida subclass have suffered harm and/or continue to suffer harm by the threat of sudden and unexpected failure of class engine chain assemblies and/or actual damages in the amount of the cost to replace the chain assemblies, essential engine parts or the entire engine, and damages to be determined at trial. .

249. Wherefore, Adams and members of the Florida subclass are entitled to, *inter alia*, injunctive and declaratory relief, actual damages, costs and attorneys' fees as provided by § 501.211 of the FDUTPA.

COUNT VI
VIOLATION OF WASHINGTON CONSUMER PROTECTION ACT (“WCPA”)
WASH. REV. CODE § 19.86.010 *ET SEQ.*
(On Behalf of Plaintiff Taylor and the Washington Subclass)

250. Plaintiff Taylor incorporates by reference all allegations in the above preceding paragraphs as if set forth fully in this count.

251. Plaintiff Taylor asserts this count on behalf of himself and members of the Washington subclass.

252. Plaintiff Taylor and members of the Washington subclass are persons within the context of the Washington Consumer Protection Act, Wash. Rev. Code §§ 19.86.010 *et seq.* (hereinafter “WCPA”) who purchased and/or leased class vehicles for personal, family or household use, specifically § 19.86.010(1).

253. Defendants are persons within the context of WCPA § 19.86.010(1). The sale of class vehicles in Washington constitutes trade and commerce of consumer goods affecting the people of the state of Washington within the context of WCPA § 19.86.010(2).

254. Defendants violated WCPA § 19.86.020 and § 19.86.093 by representing class vehicles have characteristics, uses, benefits and/or qualities that they do not possess. This conduct is injurious to the public interest that injured other persons, had the capacity to injure other persons and/or has the capacity to injure other persons.

255. Defendants violated WCPA § 19.86.020 and § 19.86.093 by representing class vehicles are of a particular standard, quality, or grade when they are not. This conduct is injurious to the public interest that injured other persons, had the capacity to injure other persons and/or has the capacity to injure other persons.

256. Defendants violated WCPA § 19.86.020 and § 19.86.093 by failing to state a material fact that deceives or tends to deceive. This conduct is injurious to the public interest that injured other persons, had the capacity to injure other persons and/or has the capacity to injure other persons.

257. Defendants violated WCPA § 19.86.020 and § 19.86.093 by advertising class vehicles without intent to sell or lease as advertised. This conduct is injurious to the public interest that injured other persons, had the capacity to injure other persons and/or has the capacity to injure other persons.

258. Defendants violated WCPA § 19.86.020 and § 19.86.093 by selling class vehicles knowing that a service, replacement or repair was needed. This conduct is injurious to the public interest that injured other persons, had the capacity to injure other persons and/or has the capacity to injure other persons.

259. Defendants violated WCPA § 19.86.020 and § 19.86.093 by deception, fraud, false pretense, false premise, misrepresentation, knowing concealment, suppression, and/or omission of material facts concerning class vehicles with the intent to deceive plaintiff Taylor and members of the Washington subclass. This conduct is injurious to the public interest that injured other persons, had the capacity to injure other persons and/or has the capacity to injure other persons.

260. At the time plaintiff Taylor purchased his pre-owned class vehicle in 2015, defendants knew that the chain assemblies in class engines were defective and would prematurely fail because the defendants had previously redesigned the timing chain assemblies for new vehicle models more than three years earlier in an effort to correct assembly deficiencies. Defendants failed to inform plaintiff Taylor of the defective timing chain assemblies in his class vehicle at the time of purchase and Taylor had no independent knowledge of the defects. Commencing in late 2010 or early 2011 as described previously in this complaint, defendants redesigned the timing chain assembly components in an effort

to resolve the chain assembly defects and issued multiple Technical Bulletins concerning the chain assemblies all of which transpired prior to Taylor's purchase of his 2012 Land Rover vehicle.

261. Defendants committed unfair and deceptive acts in the course of trade and commerce within the context of the WCPA as described in this complaint in violation of WCPA § 19.86.020 and § 19.86.093.

262. Defendants committed unconscionable, deceptive and unfair trade practices, including but not limited to deception, fraud, false pretense, false promise, misrepresentation and the knowing concealment, suppression and omission of material facts concerning the class vehicles' timing chain assemblies in connection with the sale and/or advertisement of class vehicles to the plaintiff Taylor and members of the Washington subclass.

263. Defendants fraudulently, intentionally, negligently, and/or recklessly misrepresented to plaintiff Taylor and members of the Washington subclass the required maintenance and/or maintenance intervals of class vehicle engines, including but not limited to the timing chain assemblies.

264. Defendants fraudulently, intentionally, negligently and/or recklessly misrepresented to plaintiff Taylor and members of the Washington subclass the characteristics of class vehicle engines with respect to materials, manufacture, durability, design, longevity, maintenance and operating costs. Defendants extensively advertised that class vehicles were superior in construction and extolled the quality and virtues of class vehicles including superior materials, workmanship, design, manufacture, safety, durability, reliability and performance. In fact, class engines contained a known defect as described in this complaint that caused class engines to prematurely fail.

265. Defendants actively suppressed the fact that class engines were prematurely failing because of materials, workmanship, design and manufacture defects and incorrect maintenance recommendations and maintenance intervals.

266. Defendants secretly repaired some class engines in an effort to prevent dissemination of knowledge concerning class engine defects.

267. Defendants intended that plaintiff Taylor and members of the Washington subclass would, in the course of their decision to expend monies in purchasing, leasing and/or repairing class vehicles, reasonably rely upon misrepresentations, misleading characterizations and material omissions concerning the quality of class engines with respect to materials, workmanship, design, manufacture and information in the owner's manuals and USA Warranty and Maintenance pamphlet, as well as any potential defects inherent in the engine components, including the timing chain assemblies.

268. Although defendants knew defects in class engines and misinformation in the owner's manuals were causing premature class engine failures, defendants denied any liability and attempted to shift the responsibility and cost for repairs to individual vehicle owners.

269. Information concerning class engine timing chain assembly defects described in this complaint is important to consumers in that the defect causes premature engine failures and necessitates expensive repairs, and, hence, is likely to affect a consumer's choice of vehicle to purchase or lease. Consumers typically will reasonably rely upon the manufacturers and sellers to provide accurate information as to quality and character of the vehicle they are considering purchasing or leasing.

272. If defendants had not concealed class engine defects from plaintiff Taylor and members of the Washington subclass within the express warranty period, class engines would have been repaired

without cost to purchasers as promised under the original warranty. Had he known of the timing chain defect, plaintiff Taylor would not have purchased his class vehicle.

273. Defendants fraudulently concealed unmistakable manifestations of impending class engine failures within the express warranty period without inspecting, repairing or replacing damaged internal class engine components.

274. Defendants violated the WCPA by failing to inform class vehicle owners prior to purchase and/or during the warranty period that class engines were defectively designed and manufactured and were accompanied by incorrect maintenance recommendations and maintenance intervals.

275. Defendants violated the WCPA by failing to inform class vehicle owners prior to purchase and/or during the warranty period that class engines contained defects and would require regular replacement of expensive internal engine components such as the timing chain assemblies.

276. Defendants further violated the WCPA by failing to inform prospective class vehicle purchasers that the defendants had not properly tested the engines, including but not limited to the timing chain assemblies.

277. Defendants committed unfair and deceptive business trade act practices as described in this complaint. Defendants repeatedly violated the WCPA on multiple occasions with their continuous course of conduct, including omissions of material fact and misrepresentations concerning *inter alia*, the causes of the failures of class engines owned by plaintiff Taylor and members of the Washington subclass.

278. The secret warranty programs for class engines initiated by the defendants along with other wrongful conduct of the defendants in violation of the WCPA occurred within the limitations period set out in the statute and/or is tolled by defendants' conduct.

279. As a proximate and direct result of defendants' unfair and deceptive business trade practices, plaintiff Taylor and members of the Washington subclass purchased or leased class vehicles and sustained an ascertainable loss and financial harm.

280. Plaintiff Taylor and members of the Washington subclass experienced premature class engine failure, increased repair and maintenance costs and incurred other substantial monetary damages and inconvenience.

281. The conduct of defendants offends public policy as established by statutes and common law; is immoral, unethical, oppressive and/or unscrupulous and caused unavoidable and substantial injury to class vehicle owners (who were unable to have reasonably avoided the injury due to no fault of their own) without any countervailing benefits to consumers.

282. Plaintiff Taylor and members of the Washington subclass demand judgment against the defendants for restitution, disgorgement, statutory and actual monetary damages including multiple damages, interest, costs, attorneys' fees and injunctive relief including a declaratory judgment and an appropriate court order prohibiting defendants from further deceptive acts and practices described in this complaint.

COUNT VII
NEGLIGENT MISREPRESENTATION
(On Behalf of the Nationwide Class or, Alternatively,
the New Jersey, Florida and Washington Subclasses)

283. The proposed class representatives and proposed class members hereby incorporate by reference all allegations in the preceding paragraphs as if set forth fully in this count.

284. The defendants negligently and recklessly misrepresented to the proposed class representatives and proposed class members the characteristics of class vehicles with respect to engine materials, workmanship, design and manufacture, including that the class engine had a sufficient and

adequate engine chain assemblies. The defendants negligently and recklessly misrepresented information in the class vehicles' owner's manuals that incorporated incorrect maintenance and service recommendations.

285. The proposed class representatives and proposed class members reasonably and justifiably relied upon representations made by the defendants including information in the class vehicles' owner's manual that incorporated incorrect engine inspection and service intervals.

286. As a proximate and direct result of the proposed class representatives' and proposed class members' reliance on the defendants' negligent and reckless misrepresentations, the proposed class representatives and proposed class members sustained monetary damages as described in this complaint.

287. Wherefore, the proposed class representatives and proposed class members demand judgment against defendants for multiple damages, interest, costs and attorneys' fees.

COUNT VIII
INJUNCTIVE AND DECLARATORY RELIEF
(On Behalf of the Nationwide Class or, Alternatively,
the New Jersey, Florida and Washington Subclasses)

288. The proposed class representatives and proposed class members hereby incorporate by reference all allegations in the preceding paragraphs as if set forth fully in this count.

289. There is a justiciable dispute as to whether the primary chain assemblies incorporated in class engines should be covered under the Limited Powertrain Warranty and/or New Vehicle Limited Warranty accompanying class vehicles.

290. The proposed class representatives and proposed class members request a declaratory judgment declaring that, going forward, the remedial work necessary to correct the defective chain assemblies incorporated in class engines together with all resulting damages are covered warranty claims.

291. This remedy is requested for all class members who still possess their vehicles. This remedy is authorized under the consumer fraud statutes of New Jersey together with all other states that grant each respective the proposed class representatives and proposed class member the right to seek injunctive or declaratory relief for violations of such consumer fraud statutes.

RELIEF DEMANDED

WHEREFORE, the proposed class representatives request:

(a) A proposed Order pursuant to Fed. R. Civ. P. 23(c) certifying the class and/or subclass as defined in ¶ 23 with such modifications, if any, to the proposed certification as required by this Court for the efficient and equitable administration of justice in this proceeding;

(b) An Order appointing the proposed class representatives as representative of the proposed class and designating the law firms of Thomas P. Sobran P.C. and Kantrowitz, Goldhamer & Graifman, P.C. as counsel for the proposed class pursuant to Fed. R. Civ. P. 23(g);

(c) Judgment for the proposed class representatives and proposed class members against the defendants on all issues and counts;

(d) Damages for the proposed class representatives and proposed class members, including but not limited to multiple damages, together with interest, prejudgment interest, costs and attorneys' fees;

(e) Restitution for all engine repairs incurred by the proposed class representatives and proposed class members resulting from the defectively designed and manufactured chain primary chain assemblies and incorrect maintenance and service intervals as set forth in the class vehicles' owner's manuals;

(f) A court issued declaratory judgment declaring that all class vehicle claims caused by their defective chain assemblies are within the scope of the class vehicles' warranty coverage; and,

(g) Any other relief deemed necessary by this Court.

REQUEST FOR JURY TRIAL

The proposed class representatives and proposed class members request trial by jury on all issues and counts.
